Project Title: Personal Travel Blog

Problem Statement: Create a personal travel blog hosted on IBM Cloud Static Web Apps. Share your travel adventures, tips, and captivating photos with the world. Use IBM Cloud Static Web Apps to easily update your blog and document your journeys. Inspire others to explore the beauty of the world and forge unforgettable memories!

Project Steps

Phase 1: Problem Definition and Design Thinking

Problem Definition: The project is to create a personal travel blog hosted on IBM Cloud Static Web Apps. The goal is to share travel adventures, tips, and captivating photos to inspire others to explore the world and create unforgettable memories. This involves designing the blog structure, creating engaging content, setting up the IBM Cloud Static Web Apps, and ensuring ease of updating the blog.

Design Thinking:

1. Content Planning: Plan the blog's structure, including sections for travel stories, tips, photos, and possibly a map showing the places visited.

2. Content Creation: Write engaging travel stories, share useful tips, and curate captivating photos from your journeys.

3. Website Design: Design an aesthetically pleasing and user-friendly layout for the blog using HTML, CSS, and possibly JavaScript for interactive elements.

4. IBM Cloud Setup: Set up an account on IBM Cloud and create a Static Web App to host the blog.

5. Content Management: Choose a suitable content management system (CMS) or static site generator to make it easy to update and manage the blog.
